5TH NATIONAL SCIENCE AND ENGINEERING FAIR (NSEF 2026)

The 5th National Science and Engineering Fair will be held on February 7, 2026 at Great Eastern Hotel, Quezon City. This annual scientific competition aims to provide learners with a platform to actively explore scientific topics of interest through independent research projects. This also fosters a deeper understanding of science and engineering while developing critical thinking, strengthening problem solving skills and gaining experience in communicating results.

Elementary, junior and senior high school learners with their teachers are encouraged to participate in the activity, however, please be reminded that participation to the activity is entirely voluntary and personal so those who opt to participate should adhere to the provisions of "No Disruptions of Classes Policy" outlined in DepEd Order No. 9, s. 2005, titled "Instituting Measures to Increase Engaged Time-on-Task and Ensuring Compliance Therewith."

For inquiries, sponsorship confirmation or other details please contact National Science and Engineering Fair (NSEF) at: info@sremhubglobal.com
